

YOUR TIMELINE

22 weeks, from Monday 12 October 2026 to race week starting Monday 8 March 2027. Four phases, an easier week roughly every fourth week and a lighter week over Christmas.

PHASE	WEEKS	DATES	FOCUS
1 Base	1 to 6	12 Oct to 22 Nov	Aerobic running, general strength, learning the stations
2 Build	7 to 12	23 Nov to 3 Jan	More running volume, heavier sleds, first combined sessions
3 Race specific	13 to 19	4 Jan to 21 Feb	Race pace, running on tired legs, half and full simulations
4 Peak and taper	20 to 22	22 Feb to 14 Mar	One last hard week, then reduce volume and arrive fresh

KEY DATES

Late January	Tickets bought within 6 weeks of the event cannot take the Flex add-on (the refundable option). Lite Flex is still available.
31 days before your race day	Last day for a 100% refund with Flex: 7 Feb for a Wednesday race, 11 Feb for a Sunday race. By 07:59.
7 days before your race day	Last day for a 50% refund with Flex, by 07:59.
About 3 days before the event	Individual start times published on the event page.
07:59 the day before you race	Last chance for a name change on your ticket.
Race day	Check-in opens 90 minutes before your division's first wave.

STARTING LATE

Keep **Weeks 13 to 22** as written, because they carry the race-specific work. Shorten the earlier phases to fit the time you have.

With fewer than 10 weeks to go, start at Week 13 and drop the volume on the first two weeks by about a quarter.

Book travel and accommodation now. With five days of racing at the SEC, hotels near the Clyde fill early and prices rise as the event gets closer.

STATION TECHNIQUE AND PACING

Most time is lost in the second half, at the lunges and wall balls, by people who went too hard on the first three stations. Aim for even effort across the whole race rather than fast early splits.

RUN 1

5 to 10 s per km slower than your target. The start is crowded and adrenaline makes everyone too quick.

RUNS 2 TO 8

Hold the same pace. Legs feel heavy for the first 200 m after each station; that passes.

ROXZONE

Move with purpose but do not sprint. Settle your breathing and take a drink on the way in.

STATIONS

Work at a pace you could repeat. Stopping and restarting costs more than going slightly slower.

1 SkiErg 1,000 m

W	M · W PRO	M PRO
Damper 6	Damper 6	Damper 6

Hinge at the hips and drive the handles down with your body weight, not just your arms. Breathe out on each pull. Pick a pace you could hold for 2,000 m.

Watch: Watch the monitor from 900 m and raise your hand at 1,000 m. Do not step off until the judge confirms.

2 Sled push 50 m (4 × 12.5 m)

W	M · W PRO	M PRO
102 kg	152 kg	202 kg

Low body angle, arms locked or slightly bent, short fast steps on the balls of your feet. At the end of each lane, walk round and set your position before you push.

Watch: Keep it moving: getting a stopped sled going again is the hardest part.

3 Sled pull 50 m (4 × 12.5 m)

W	M · W PRO	M PRO
78 kg	103 kg	153 kg

Chalk up. Lean back and walk backwards to the rear of the racer's box, then pull hand over hand while stepping forward, using your legs and body weight.

Watch: Keep the rope tidy in your lane so it does not tangle. Stay standing throughout.

4 Burpee broad jumps 80 m

W	M · W PRO	M PRO
Bodyweight	Bodyweight	Bodyweight

Find a rhythm you can hold for 80 m and keep it. Stepping back and stepping up out of the burpee is allowed and saves energy for most people.

Watch: Jump a comfortable distance; a huge jump makes the next burpee slower. Overtaking is allowed, so move round anyone slower.

05

RACE CARDS

Copy your splits from the table nearest your prediction. Clock is the time on your watch at the end of each segment, with the Roxzone spread evenly. Cut out, fold along the line and keep it in your kit bag. Phones are not allowed on the course, so read it in the warm-up.

Example: Men, 1:30
